DETAILED ACTION

1. This communication is in response to the Applicant's amendment filed 10 November 2004. Claims 1-14 are pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

4. A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Delgado et al (US 6,801,909).

6. Regarding claim 1 –

Delgado discloses a computerized method for generating a recommendation of an item to an advisee, comprising the steps of: receiving a recommendation request comprising a selected item list from an advisee for a recommendation by a recommendation system; in response to the recommendation request, computing a plurality of similarity factors based on items from the selected item list that indicate similarity between the advisee and a plurality of users of the recommendation system who have previously

Art Unit: 3621

provided ratings of items from the selected item list selecting, from the plurality of users of the recommendation system, neighboring users to the advisee, according to the similarity factors; generating a recommendation of at least one item of the selected item list items, according to the previously provided ratings of the at least one item plurality of items by the neighboring users (e.g. col 3 ln 55 – col 4 ln 35).

7. Regarding claim 2 –

Delgado discloses the method of claim 1, wherein all items upon which the step of computing depends are included in the selected item list (e.g. col 4 ln 20-35).

8. Regarding claim 3 –

Delgado discloses the method of claim 2, wherein the recommendation of at least one item includes only items that are included in the selected item list (e.g. col 4 ln 30-35).

9. Regarding claim 4 –

Delgado discloses the method of claim 1, wherein the step of selecting neighboring users excludes, any user whose similarity with the advisee is below a predetermined threshold (e.g. col 3 ln 35-50).

10. Regarding claim 5 –

Delgado discloses the method of claim 1, wherein the step of computing and the step of selecting are executed substantially in parallel by inserting each newly computed similarity factor into a neighbor list in decreasing order of similarity and by limiting length of the neighbor list by excluding a user with lowest similarity if otherwise the neighbor list would exceed a predetermined length (e.g. col 3 ln 45-60).

11. Regarding claim 6 –

Art Unit: 3621

Delgado discloses the method of claim 1, further including the step of caching identifiers of the neighboring users, associated similarity factors, and time stamps (e.g. col 3 ln 55-60).

12. Claim 7 is rejected under 35 U.S.C. 102(a) as being anticipated by Delgado et al (US 6,801,909).

13. Delgado discloses a user profile for a recommendation system, comprising a plurality of records, each record including a user identifier, an item identifier, and a rating value, wherein each record is linked in a first and a second dimension, the first dimension linking records with a same user identifier in a sequence according to the item identifier, and the second dimension linking records with a same item identifier in a sequence according to the user identifier (e.g. col 3 ln 55 – col 4 ln 35).

14. Claims 8-14 are rejected under 35 U.S.C. 102(a) as being anticipated by Delgado et al (US 6,801,909).

15. Regarding claim 8 –

Delgado discloses a computerized method for generating a recommendation of an item to an advisee, comprising the steps of receiving a selected item list from an advisee; selecting a first set of users from a group of users based on the selected item list; selecting neighboring users from the first set of users based on similarities between the advisee and each member of the first set of users; generating a recommendation of at least one item from the selected item list based on ratings provided by each neighboring user (e.g. col 3 ln 55 – col 4 ln 35).

16. Regarding claim 9 –

Art Unit: 3621

Delgado discloses the computerized method of claim 8, wherein the similarities are determined from an advisee profile and user profiles, and the advisee and user profiles are based on advise and user behavior including at least one of buying pattern, item ratings, bookmarked websites, website usage pattern, and user action relative to a particular item (e.g. col 4 ln 20-35).

17. Regarding claim 10 –

Delgado discloses the computerized method of claim 9, wherein an advisee profile or a user profile is updated when a new piece of information is added thereto (e.g. col 4 ln 30-35).

18. Regarding claim 11 –

Delgado discloses the computerized method of claim 8, further comprising assigning a confidence factor to each advisee profile and each user profile, wherein the confidence factor is based on the combined effect of selected pieces of information recorded in a user or advisee profile (e.g. col 3 ln 35-50).

19. Regarding claim 12 –

Delgado discloses the computerized method of claim 8, further including determining similarities between the advisee and each member of the first set of users after receiving a selected item list from the advisee (e.g. col 4 ln 45-60).

20. Regarding claim 13 –

Delgado discloses the computerized method of claim 8, wherein a member of the first set of users is selected as a neighboring user if the similarity between the advisee and

Art Unit: 3621

the member of the first set of users is better than a predetermined threshold (e.g. col 3 ln 55-60).

21. Regarding claim 14 –

Delgado discloses the computerized method of claim 8, further comprising assigning a weight to each neighboring user where the weight is greater for a neighboring user have greater similarity to the advisee and the weight is lower for a neighboring user having a lower similarity to the advisee (e.g. col 3 ln 55-60).
